

## GREG GEISELMAN SHAPER/SURFER

Since 1985, Orion surfboards and shaper Greg Geiselman have been focused on making the highest quality performance surfboards. Through extensive research and development from team riders, and feedback from customers, Orion has developed a diverse line of high performance surf equipment designed to meet the demands from the beginner to the most advanced professional surfer.

Greg Geiselman's background as a former professional, with seven years experience on the ASP East Tour, and his extensive global travel give him unmatched insight into surfboard design. With over 24,000 boards shaped to his credit, Greg is a respected international shaper who not only performs in the shaping room but also out in the line-up.

SURFBOARDS

## SHORTBOARDS

### EVG

Performance shortboard designed with the help of Evan Geiselman. This board combines a more aggressive bottom rocker/single concave and curvier outline. From big carves to airs, this board is for high performance surfing. Ridden usually your same height or 1" bigger.

### LARK

The Lark model was designed with Eric Geiselman. Like Eric's surfing, this board is buttery smooth, adapting to a wide range of waves from waist to head-high. This board features a relaxed entry rocker blending with a moderate concave to a slightly exaggerated tail rocker. The end result is a fast yet maneuverable board that's easy for everyone to ride.

TAIL OPTIONS  
Squash or Swallow

### DIAMOND HEAD

Small wave machine. This is a board for those who want a little more float in small surf conditions. Great for those small, under chest high conditions of summer.

## LONGBOARDS

### SEMI GUN

For surfers looking to ride bigger waves. Board ranges from 6'8" to 7'6".

### PERFORMANCE LONGBOARD

This longboard has a little more rocker throughout than the Nose Rider. Designed for the surfer that wants to surf more progressively, yet still have the ability to ride the nose. A great all around longboard.

TAIL OPTIONS  
Squash Round, or Swallow

CONSTRUCTION OPTIONS [ALL BOARDS] PU or Epoxy, with or without carbon tail patches. FIN OPTIONS [ALL BOARDS] FCS, Futures, and glass on.

### TOASTER

This is one of our more popular performance shortboards. This board has a gradual, continuous rocker and single concave bottom, which help it adapt well to many conditions from waist high to a couple feet overhead around the world.

### TAIL OPTIONS

Squash, Round, or Swallow

### WHO CARES [WC]

Small wave design influenced by Evan Geiselman. A lower entry rocker with wider outline help this board to be fast and responsive in waist to head high conditions. A great board for in between a shortboard and the Menace. Order 1-2" under your shortboard.

### TUG

This board was designed for small, fun, mushy waves. A fuller outline with a concave/vee combo bottom. A fun alternative to regular small wave boards. Should be ridden 5-6" shorter than your normal shortboard. Available in a 3 fin or 5 fin set up.

TAIL OPTIONS  
Squash or Swallow

### ROUNDIE

The ultimate traveler: this board ranges from 6'4" to 6'8" designed with maximum hold and maneuverability in mind. Available in 2 bottom designs, single concave, or reverse-V into double concave.

TAIL OPTIONS  
Round

### MENACE II

Updated version of the original Menace, one of our best selling models. The rocker was smoothed out a little and the last third of the board outline has been slightly widened. Rails are a touch fuller with the bottom still running a 3x concave, creating a board that maintains speed through flat sections, yet turns well in small pockets.

TAIL OPTIONS  
Squash, Round, or Swallow

### RETRO

Past meets present: blending past design with present technology makes this board extremely fast and maneuverable, and the board to ride in any small surf conditions.

### BIG MACK

Performance oriented big board: for surfers that want more flotation without sacrificing performance. Wider and fuller outline help with paddling and a triple concave bottom enhances maneuverability. Also available in single concave bottom.

TAIL OPTIONS  
Squash, Round, or Swallow

### FRICKER

Small wave design for the surfer who won't ride a fuller nose fish. A wider front outline combined with a mild rocker make it an easy board to ride in gutless waves. Should be ordered 2-3" smaller than your regular shortboard.

TAIL OPTIONS  
Squash, Round, or Swallow

### GENERAL

The General is an easy board to ride. A full nose and outline help to lift it in small surf. The bottom consists of a vee blended with a slight double concave, helping to keep this fast and maneuverable.. This board could be ridden as a single fin, tri or quad

### PIN UP

Wave catching machine: designed with a progressive bottom rocker blending with a concave/vee combination to keep it fast and loose. Great for the surfer that wants to catch waves with ease, yet still do some progressive turns. Available from 6'6" to 8'0".

TAIL OPTIONS  
Squash, Round, or Swallow

### NOSE RIDER

This longboard was designed for those small fun days. A very smooth entry rocker blending with the concave nose and panel vee give this board great glide and stability. One of our most popular models.

TAIL OPTIONS  
Squash or Round
